## Receive up to \$3,000 toward an Earthquake Retrofit

**Earthquake Brace + Bolt (EBB)** helps homeowners lessen the potential for damage during an earthquake. EBB offers up to \$3,000 toward a code-compliant seismic retrofit for houses that qualify.

### A Brace and Bolt Retrofit

In an EBB retrofit, the foundation is bolted, and if there is a cripple wall, it is braced.

- **Bolting:** adding anchor bolts in the crawl space to help prevent the home from sliding.
- **Bracing:** adding plywood to the cripple walls to stiffen them and help prevent the home from collapsing.

**NEW ELEMENTS MAKE UP A SEISMIC RETROFIT**

### Houses that qualify, typically:

- Are built before 1980 (but are more prevalent before 1940);
- Have a raised continuous perimeter concrete foundation;
- Sit on level ground or a low-slope; and
- May have wood-framed walls (called cripple walls) in the crawl space under the first floor.

### Supplemental Grants Available

EBB is also offering a **Supplemental Grant** to help low-income households pay up to 100 percent of the cost to seismically retrofit their homes. A “low-income household” is defined as a household with income at or below \$72,080. These grants are based on available funds.

### Registration

#### To apply for the the EBB program:

Go to [www.EarthquakeBraceBolt.com](http://www.EarthquakeBraceBolt.com) between October 27 and December 1, 2021. Create an online account and answer questions for an opportunity to participate. Participants will be randomly selected.

A permit must not be issued before you have been accepted into the program, and retrofit construction work must not begin before being notified by EBB that your pre-retrofit documents have been approved.

EBB has helped more than 15,000 homeowners seismically retrofit their older house. EBB is working to create more resilient communities, one house at a time.
